HealthWay

We breathe innovation.

A modern living room with a white sectional sofa, a coffee table, and a chandelier. The room is bright and clean, with large windows in the background. The text is overlaid on a semi-transparent grey bar across the middle of the image.

Indoor air pollution is one of the top five risks to our health.

A modern living room with a white sectional sofa, a coffee table, and a chandelier. The room is bright and clean, with large windows in the background. The text is overlaid on a semi-transparent grey band across the middle of the image.

Indoor air is 200-500% more polluted than outside  
We inhale about 45,000-75,000 particles of pollutants with each breath.

# Three Main Pollutant Categories

# 1. Airborne Particles

## Allergens

Dust mites, dust mite feces, pet dander, pollen, cockroach feces, mold and dust

## Results

Allergic reactions, respiratory problems and asthma attacks

## 2. Gaseous Air Contaminates (VOC's)

### **Common Products found in the home**

Odors, fumes, chemicals fragrances, cosmetics, paint fumes, solvents, aerosols, and everyday cleaning products

# 3. Microorganisms

## **Bio-Aerosols (Biological Particles)**

Viruses, mold and mildew, bacteria and fungi

Causes, infectious and non-infectious diseases - Colds, influenza and respiratory infections

A clear blue sky with scattered white clouds. The text is centered in the middle of the image.

The one solution to address  
all three pollutant categories

# HealthWay Deluxe

## Professional 9-stage Purification System

## Super Adsorbent Seven-Stage Pre-Filter

1. **Anti-Microbial Poly Propylene Mesh:** collects large particles - dust, hair, lint and reduces growth of bacteria on filter.
2. **VOC Diffuser:** Diffuses air through honeycomb VOC filter penetrating the 3 stages.

## Super Adsorbent Seven-Stage Pre-Filter

3. **Zeolite Pellets:** VOC/Gas Adsorbent.
4. **Carbon Pellets:** VOC/Gas Adsorbent.
5. **Potassium Permanganate:** VOC/Gas Oxidizer

## Super Adsorbent Seven-Stage Pre-Filter

- 6. VOC Diffuser:** Diffuses air out of honeycomb VOC filter to the next filtration stage.
- 7. Anti-Microbial Poly Propylene Mesh:** collects large particles - dust, hair, lint and reduces growth of bacteria on filter.

 HealthWay

## Disinfecting Filtration System (DFS)

- 8. DFS Germicidal Technology:** Captures dust, mold, pollen, dust mite, debris and more; and destroys up to 100% of these captured contaminants
- 9. Main Filter:**
  - Better than 99.99% particle reduction at 0.3 micron
  - Four times the particle holding capacity as a similar HEPA filter
  - Traps microorganisms for germicidal exposure

## Additional Deluxe Features

### **360° Air Intake**

Allows placement anywhere, assuring full room treatment

### **Dual Air Intake Blower**

Drives a consistent volume of air with ultra-quiet operation

### **100% Sealed Filtration Chamber**

All incoming air is treated in a 100% sealed filter chamber

### **Electronic Control Panel**

Indicates when to replace main filter

Bio-monitor light shows DFS Germ Control is working efficiently

Convenient 3-speed control including low speed ultra-quiet air flow option

HealthWay

Doctors recommend the HealthWay Deluxe as the world's most advanced medical grade air cleaning system.

Your indoor air will be up to 90% cleaner in just 30 minutes.

## Tabletop Unit

Ultra slim design ideal for home or small office use

Utilizes the same advanced, patented technology

Why HealthWay makes  
perfect business sense.

Individually certified better than HEPA efficiency

Full product training and certification

Exclusive product | No-Internet policy

No set MSRP | High profit margins

Continued sales, service and technical training

Exclusivity on service and filter replacement

# Professional Marketing Materials

**HW Deluxe Professional 9-Stage DFS Air Purification System**

Utilizing technology developed through a United States Military Grant focused on germ warfare, the professional line of air cleaning by HealthWay is the only system to effectively address all three pollutant categories. The system has been proven to capture 99.99% of all particles as small as .007 micron in size. The heavy duty commercial-grade gas and odor filter eliminates most gases and the patented DFS technology removes 99-100% of harmful viruses, mold, and leaving nothing but fresh, pure, healthy air. This technology is currently used in medical clean rooms, government buildings, and military applications.

**HW Deluxe PROFESSIONAL DFS AIR PURIFICATION SYSTEM**

**7-Stage Pre-Filter**

- Stage 1** - Poly Propylene Mesh: L
- Stage 2** - Anti-Microbial: Inhibits b
- Stage 3** - Zeolite Pellets: VOC-Red
- Stage 4** - Carbon Pellets: VOC-Red
- Stage 5** - Potassium Permanganate
- Stage 6** - Anti-Microbial: Inhibits b
- Stage 7** - Poly Propylene Mesh: L

**360° Air Intake**  
Allows placement anywhere, ass

**Dual Air Intake Blowers**  
Drives a consistent volume of ai

**Sealed Filtration Chamber**  
All incoming air is treated in a 100

**DFS Germicidal Techn**

- Stage 8** - Captures dust, mold, pet, and removes up to 100% of these
- Stage 9** - Better than 99.9% partic 4 times better loading capacity than Traps microorganisms and inhibits microbioestasis condition.

**Electronic Control Panel**  
light Indicates when to replace m Bio-monitor light shows DFS Ge working efficiently  
Convenient 3-speed control  
Low speed ultra-quiet air flow control

**Clean Fresh Air 365 da**

healthway.com

**FEATURES**

Particle efficiency - 99.99% at 0.007 micron  
9-stage VOC adsorption filter for heavy removal of harmful gases and odors

This revolutionary technology reduces bioburden and inhibits microorganism growth through Microbioestasis condition

Independently tested and verified to guarantee better ultraviolet particle efficiency than HEPA, CE, UL, CSA and ISO listed

**SPECIFICATIONS**

Dimensions (inches)	15 w	16 d	27 h
Weight 36lbs (16.3kg)			
	high	med	low
Power Consumption (Watt)	125	75	65
CFM (Cubic Feet/Minute)	200	125	85
Operation noise (dB)	58	51	45
